MEET THE TEAM

WELCOME

Lizzy Akers-Wood

What's your role, tell us about what you do and how long have you been a part of the team?

I am a member of the parts team at the Kirkbymoorside depot, I've been here 2 months, so everything is still quite new but I am really enjoying it so far!

What does a typical day look like for you?

A day in the life of Lizzy usually starts by going to see my two horses, I am very lucky to live local to the depot so that's followed by a short drive to work. Being in the parts department you do have a daily routine but at the same time every day is different as you never know what customers are going to ask for. My day usually ends the same way as it starts by spending some quality time with my horses in the evening!

If you could have a super power to get you through the week what would it be?

If I had a superpower it would be being able to turn daylight on and off at my leisure depending on what I was doing, although the autumn/winter months can be cosy sometimes, I'm not ready for it to be dark so quickly on an evening just yet!!

Favourite weekend Hobbie or activity?

My favourite weekend hobby would be going for a walk with my partner usually followed by a sandwich from one of the many lovely sandwich shops near us – I do quite enjoy a shopping trip too!

What book, show or movie are you currently recommending to everyone?

I can't think of anything in particular, but I'm definitely a movie person and I love a good rom-com so I'm always working my way through the recommended selection on Netflix! Some of the best ones I've watched recently are 'How to lose a guy in 10 days' and 'What women want'!

At JG Paxton & Sons, we showcased practical, high-performance technology designed to keep local farmers, contractors, and hill operators running effectively year-round:

Case IH: Top Tier horsepower, comfort, and advanced telemetry for Cumbria, Lancaster, and West Yorkshire.

Kverneland: Industry-leading cultivation, seeding, and grassland equipment built for soil care and durability.

Polaris: Rugged, off road versatility with custom finish built for tough hill farms. Featuring the 'Big Boss' 6-seater Sportsman.

Honda: Hard working ATVs and Pioneer UTVs delivering legendary daily reliability.

Westmorland Agricultural Show Recap

This year's Westmorland Show was one of our best yet!

Thank you to everyone who dropped by to discuss technical specs, demonstrations, and smart farming tech. We're proud to support our local agricultural community with top quality machinery and reliable local service.

MISSED OUT? Contact your local areas sales rep to discuss any of supplier products featured, and more. Tailor support to suit your farms needs.

All New Limited Availability Honda have launched two special edition models, featuring striking new finish options built to handle the toughest terrain in style.

Honda TRX 520 FA6 in True Timber Atera Camo

The ultimate flagship utility quad combining automatic Dual Clutch Transmission (DCT), Independent rear suspension, power steering, and active features like dual clutch transmission (DCT) or a locking front differential for a smoother, highly capable ride.

Paxtons Attend Lowe Maintenance Training & Ride/Drive Day

On 15 September, Paxtons attended the Polaris Lowe Maintenance Training Day, which formed part of the Ride or Drive Day. Representing Paxtons, Gary Robinson had the opportunity to get hands-on with a selection of Polaris off-road vehicles, exploring their capabilities, practical features and suitability for a range of working environments.

The day provided a valuable opportunity to experience the machines first-hand rather than simply viewing them in a showroom. Gary was able to see how the different models perform across varied terrain and understand the benefits each vehicle can offer depending on the task. The event also highlighted the Lowe-maintenance approach behind the Polaris range, with a strong focus on reliable, practical machines built to work hard while keeping day-to-day operation straightforward.

A big thank you to everyone who attended and made the day possible.

The JCB Fastrac is making News... ... and we are with them; what a piece of machinery, introducing the Fastrac 6300

Driver's view: JCB Fastrac owner rates his pair of 6300s.

Hauling heavyweight tankers, spreaders and trailers across England's northernmost counties requires a tractor that's as adept at clocking up hours on tarmac as it is in the field.

That is why Mark Tiplady of Tiplady Tanker Services has been gradually cutting down the number of conventional models in his fleet in favour of JCB Fastracs.

The latest additions are a pair of newly minted 6300s, armed with a 6.7-litre FPT six-cylinder engine allied to a ZF Ecom stepless transmission.

Like smaller 4000-series models, they run equal-sized wheels.

However, rim sizes have swelled to 38in to reduce rolling resistance and improve grip.

These credentials should make them well suited to towing Mark's 20'000 litre Zunhammer and Kumn Technik Tankers, 20t Ktwo Muck-spreaders and 16t silage trailers.

Published Farmers Weekly by James Andrews, 14 September ©

At Paxtons, we were delighted to read this review featuring within Farmers Weekly. We know firsthand how the JCB Fastrac is revolutionising farming performance through innovative engineering.

Engine & Transmission Power: Equipped with a 6.7 litre FPT six cylinder engine paired with a XF Ecom stepless (CVT) transmission, delivering continuous, smooth power delivery without standard gear shifts.

Superior Traction & Lower Rolling Resistance: Features equal-sized wheels upgraded to 38 inch rims, which reduce rolling resistance and maximise grip in heavy field conditions.

Heavy Towing Capability: Built to handle massive agricultural payloads, easy hauling high capacity machinery such as slurry tankers, muck spreaders and silage trailers.

The combination of full suspension, speed, traction and high capacity pulling power makes the Fastrac a far more efficient choice for heavy transport and intensive contractor operations than standard tractors.

Portable Heater For Professional Use

The Airrex AH-500i and AH-900i burn diesel with blue flame – cleaner and hotter than any Airrex before. Inside: the worlds smallest and quietest blue flame burner, Wifi and Rex Nordic app. Register online for a total warranty of 5 years. The world's most affordable way to heat any hall space.

Key Accessories & Add-Ons

Protective frame

(AIRREX AH-300/300i /310i & AH-500i)

FROM £369.00

The Airrex protective frame protects the heater from dents caused by heavy use. The big wheels underneath make it easier to move the heater in challenging conditions. At the other end of the protective frame, there are holders for electric cables.

Airrex AH-500i Diesel Infrared Heater

Next-generation 15 kW diesel infrared heater with the new Blue Flame burner – for workshops, warehouses and sites up to 1,500 m³.

Heating power 11 and 15 kW (Dual Power)
Fuel tank 45 L Fuel consumption 1.05 - 1.42 L/h
Noise level 47 dB App control Rex Nordic app
Warranty 5 years (requires registration)

£1995.00 +VAT 0%

Airrex AH-900i Diesel Infrared Heater

The most powerful Airrex – up to 24 kW of infrared heat with the new Blue Flame burner, for industrial halls and sites up to 2,500 m³.

Heating power 19 or 24 kW (Dual Power)
Fuel tank 70 L Fuel consumption 1.81 - 2.3 L/h Noise level 48 dB
App control Rex Nordic app
Warranty 5 years (requires registration)

£2,695.00 +VAT

Service Kits

The Service Kit Pro contains everything needed for a complete service of Airrex AH-series diesel heaters. Recommended for machines that are 3 years or older, or when a full overhaul is needed.

Kits contain: Nozzle, Fiber gasket, Graphite gasket, Fuel filter, Spark igniter, Extraction hoses (2 pcs.), Suction hose (1 pc.), Airflow regulator, Rubber grommet. Trolley suitable AIRREX AH-200 AH-300

MS-AH10116 – 300/500i Transport cart

£119.00 +VAT

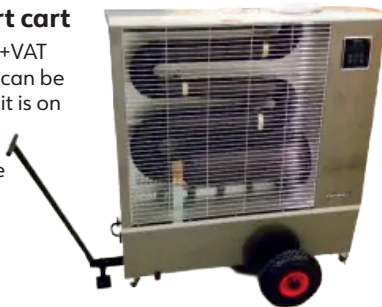

MS-AH10117 – 800/900i

Transport cart

£119.00 +VAT

The heater can be used when it is on the trolley.

Detachable draw bar.

AIRREX[®] INFRARED BIOHEATERS

AIRREX is the market leader in fuel-driven infrared heaters. AIRREX infrared heaters have already been manufactured for over 30 years.

ADVANCED BURNER

The device has a burner with an electric fuel pump. The combustion gases are circulated through pipes with ceramic coating and creates heat as infrared radiation.

NO FUMES, NO ODOR

The triple combustion process ensures complete and clean combustion. Normal ventilation is sufficient.

EFFECTIVE SOUND DAMPENING

The silencing system inside the exhaust pipe that compresses and expands the exhaust makes AIRREX very quiet - only 48dB.

TOUCH CONTROL

Simple soft-touch control panel with LED display and remote control.

FUEL

Biodiesel or Diesel

WHY AIRREX?

Infrared radiation heats up the material in addition to the air. The heat is even and no fan is needed. Ventilation in accordance with building regulations is sufficient.
